An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ted Anthony on 12/8/04.

The application has been amended as follows:

IN THE CLAIMS:

Claims 1, 5, and 29 were amended as follows:

Claim 1. (Currently amended) A method of treating waste supported in a liquid comprising:

- a. Inoculating at least one carrier medium with at least one microbial population;
- b. Placing said at least one inoculated carrier medium within a porous container;
- c. Immersing said porous container in said waste supporting liquid;
- d. Supplying oxygen to said porous container and said at least one microbial population; and
- e. Allowing said at least one microbial population to propagate on the surface of said at least one carrier medium Propagating said at least one microbial population on the surface of said at least one carrier medium.

Claim 5. (Currently amended) A method of treating waste in a sewer wet-well comprising:

- a. Inoculating at least one carrier medium with at least one microbial population;
- b. Placing said at least one inoculated carrier medium within a porous container;
- Installing said porous container in said sewer wet-well;
- d. Supplying oxygen to said porous container and said at least one microbial population; and
- e. Allowing said at least one microbial population to propagate on the surface of said at least one carrier medium Propagating said at least one microbial population on the surface of said at least one carrier medium.

Art Unit: 1724

Claim 29. (Currently amended) A method of treating waste supported in a liquid comprising:

- a. Inoculating at least one carrier medium with at least one microbial population;
- b. Placing said at least one inoculated carrier medium within a porous container;
- c. Immersing said porous container in said waste supporting liquid;
- d. Supplying oxygen to said porous container and said at least one microbial population; and
- e. Allowing said at least one microbial population to propagate on the surface of said at least one carrier medium Propagating said at least one microbial population on the surface of said at least one carrier medium while said porous container is immersed in said waste supporting liquid.
